

## Community Outreach Events

Community Outreach Events will be held in October at locations in or near your community. Please see the table below for more details. The events will include representatives from The McConnell Foundation, VESTRA Resources, and partner organizations. These representatives will present:

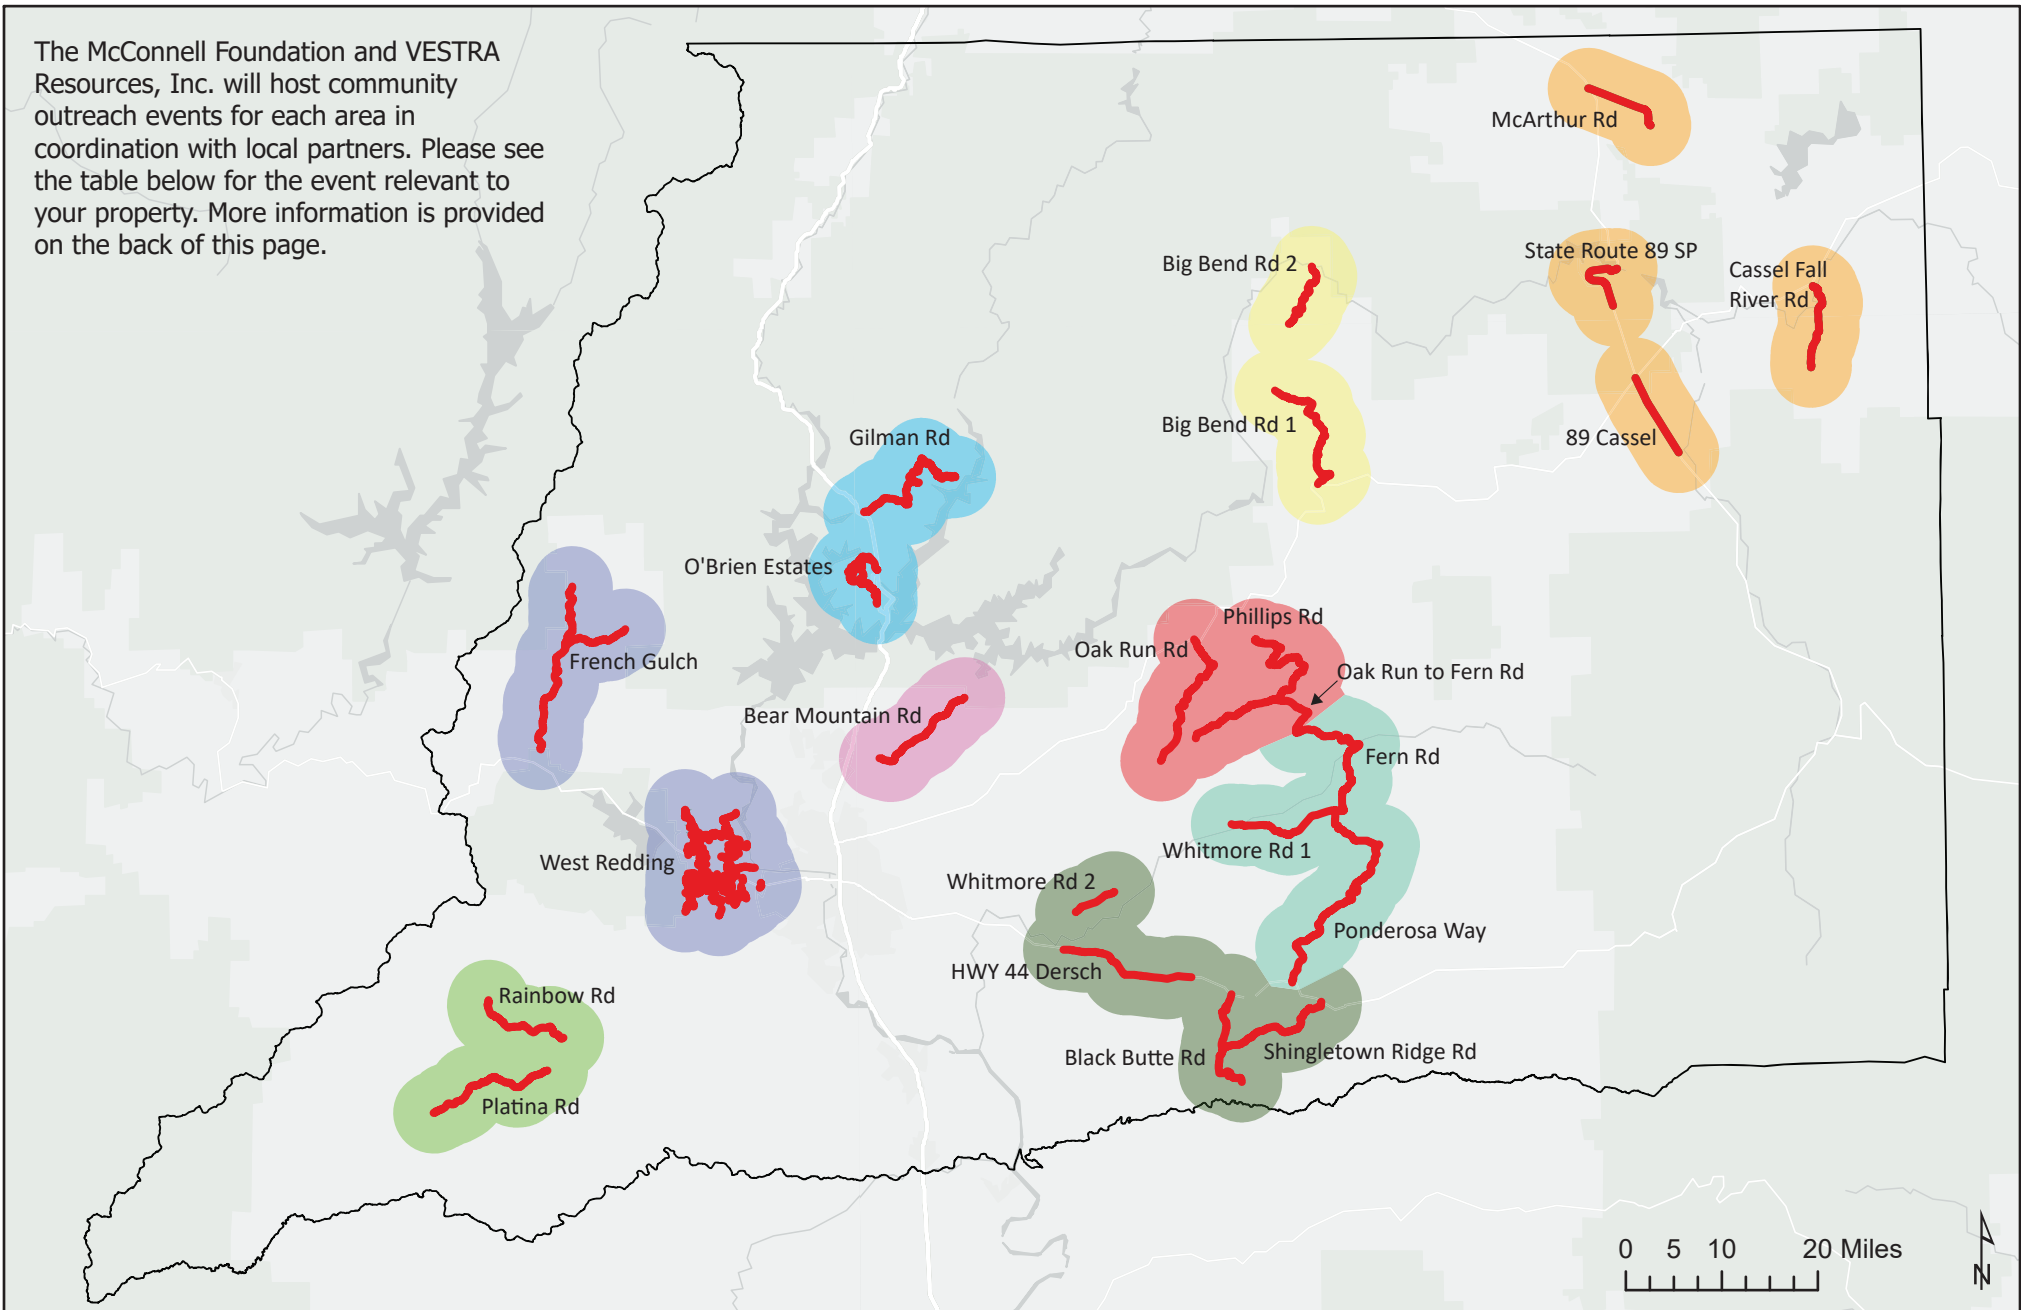

- Maps of where the proposed vegetation treatments will take place.
- Anticipated Project schedule.
- Description of Project activities – site assessments, landowner consultations, and vegetation management/fuel reduction activities.
- Description of who will be performing the treatments to reduce hazardous vegetation.
- Discussion of the voluntary agreement (ROE) as the first step in the Project.
- Description of desirable project outcomes – to reduce wildfire intensity, provide safe evacuation routes for residents in wildfire situations, provide strategic points for fire suppression, improve safety for responding emergency personnel, etc.
- Q&A Session – answers to questions from the community about the project.

We look forward to meeting with your community. This effort is to complement the ongoing efforts of property owners in the region to make our forests more fire-resilient, lessen the risk of wildfires, and improve the safety of our communities.

Although it is preferred that you attend the event for your area, you are welcome to attend any of the above events. Keep in mind that seating may be limited.

Date	Time	Location	Landowners invited	Partner Host Organization(s)
